### About the program

'Art for YOUth' is a professional visual arts program designed to meet the needs of the beginners as well as those who already have some experience in painting and drawing. Participants explore a wide variety of subjects such as landscape, still life, animals, portrait, abstract etc. They get to use diverse materials and media including paper, canvases, mixed media, oil and soft pastels, pencils, acrylic and water paints, chalk and many other.

Projects change from session to session so there is always something new to learn for both first time registrants as well as for those who register for consecutive sessions.

Art pieces created by our students often decorate their homes or are given as unique presents to family and friends. They can be also used to build a portfolio required for specialized art programs in secondary schools.
